

## NACD Minnesota Chapter | Minneapolis An Update on the Midterm Elections and the Trump Administration

This was our third visit from Michael with updates from Washington D.C. His first visit was shortly after the 2016 elections and then an update on the Trump agenda followed in 2017. This visit addressed the midterm elections and looking forward.

Michael said there are five things that are, once again, important to remember:

1. Ignore the noise!
2. Regulators are still regulating!
3. Keep an eye on the GOP but watch out for the Democrats!
4. Everything in Washington is deadline driven!
5. Twitter remains a part of this administration and corporations should be ready! Corporations have been and will likely continue to be a component of the president's tweets.
